

DEEPIKA B.R

Aspiring Data Scientist |Software Engineer

Gmail : deepika060107@gmail.com | LinkedIn: linkedin.com/in/deepika-b-r-9b2207329 | Github: https://github.com/DEEPIKA0620

PROFESSIONAL SUMMARY

Motivated B.Tech (IT) student with experience in Python, Machine Learning, Data Analytics, and Full-Stack development. Proven background across technical internships delivering automated data processing workflows, text analytics (NLP), and optimized backends. Seeking entry-level roles or internships across Data Science, AI Engineering, or Software Development.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, JavaScript (ES6), HTML5, CSS3, Flask, FastAPI, Streamlit, React Native, Node.js, Express.js
- **Data Science & ML:** Pandas, NumPy, Scikit-learn, TensorFlow.js, NLP, TF-IDF, Logistic Regression, Classification, EDA, Feature Engineering
- **Databases & Tools:** MySQL, SQLite, JWT, Tesseract OCR, REST APIs, Git, GitHub, Jupyter Notebook

WORK EXPERIENCE

Python Development Intern | Cognifyz Technologies

(Jul 2025 – Aug 2025)

- Optimized functional Python programs using core data structures and modular loops to maximize code execution efficiency.
- Improved repository maintainability and readability by implementing standardized clean-coding paradigms.

Data Analyst Intern | Future Intern

(Jun 2025 – Jul 2025)

- Architected automated data cleaning scripts using Pandas and NumPy, reducing dataset processing times by 80%.
- Synthesized analytical findings into clear visualizations using Matplotlib and Seaborn to support strategic choices.

Data Science Intern | Prodigy Infotech

(Dec 2025 – Jan 2026)

- Constructed NLP sentiment analysis pipelines using TF-IDF feature extraction and Logistic Regression on text datasets.
- Executed advanced data preprocessing, feature engineering, and exploratory data analysis (EDA) using Pandas.

PROJECTS

IntelliCode – Software Defect Prediction & Code Quality Platform

Tech Stack: Python, Flask, Scikit-learn, Pandas, NumPy, HTML, CSS, JavaScript

- Developed a machine learning–based software defect prediction platform using the NASA PROMISE JM1 dataset, achieving 91% classification accuracy and identifying 1,000+ code modules for defect risk analysis.
- Built a Flask web application with bulk CSV upload, automated risk scoring, and interactive dashboards, reducing manual defect analysis time by 70%.

TravelAlert – Smart Location-Based Transit Alert System

[In Progress]

Tech Stack: React Native, Node.js, Express.js, SQLite, TensorFlow.js, Leaflet Maps, JWT

- Developed a cross-platform mobile application integrating GPS geofencing, real-time location tracking, and push notifications to provide transit alerts with 95% location detection accuracy.
- Designed a secure REST API using Node.js, Express.js, Sequelize ORM, and JWT Authentication, supporting multiple concurrent users with optimized backend response times below 300 ms.

XFinance – Intelligent Financial Decision Platform

Tech Stack: Python, Flask, Tesseract OCR, Chart.js, HTML, CSS, JavaScript

- Built a full-stack financial management application integrating Tesseract OCR to extract and process data from invoices and receipts with approximately 93% text recognition accuracy.
- Implemented automated expense tracking, break-even analysis, and interactive financial dashboards, reducing manual budgeting effort by 65% through real-time data visualization.

CERTIFICATIONS

- Cloud Computing (12-Week Course) – NPTEL | Score: 76%
- Data Analytics Job Simulation – Deloitte (Hosted via Forage)
- Python 101 for Data Science – IBM (Hosted via Cognitive Class)

EDUCATION

- B.Tech in Information Technology
Agni College of Technology, Chennai ,
Current CGPA : 7.65 |Expected Graduation : 2028
